Products are manufactured under an ISO 9001 quality management system

Wood's Powr-Grip products are sold through authorized dealers.

## **DC-POWERED** COUNTER-BALANCER WITH REMOTE CONTROL FOR USE WITH THE MANUAL ROTATOR 2800

Wood's Powr-Grip® has created a new counter-balancer that is capable of lifting up to 2800 lbs. [1270 kg]. Redesigned with material and operator safety in mind, the CB3DCS counter-balancer functions in combination with the powerful MR16 vacuum lifter. For upper story window or curtain wall installation under an overhang, the CB3DCS is the ideal tool for the job.

#### **COUNTER-BALANCER**

Horizontal Reach	Minimum: 65" [1651 mm] Maximum: 83" [2108 mm]
Overall Length	222" [5636 mm] (Note: Does not include MR1611LDC Vacuum Lifter.)
Maximum Load Capacity	2800 lbs [1270 kg] (including weight of vacuum lifter).
Unit Weight	1425 lbs [646 kg] (Note: Does not include user-supplied ballast material or vacuum lifter.)
Standard Operating Power	12 volts DC, 58 amps
Features	<ul> <li>DC-POWERED COUNTERBALANCE provides effortless counterweight motion, enabling the operator to keep the lifter balanced at all times.</li> </ul>
	• <b>RADIO REMOTE CONTROL</b> enables the operator to control the counterbalance from distances up to 250 ft [76 m] away, as required for glass installations off the ground. Note: When paired with a remote controlled MR16 vacuum lifter, also syncs with apply and release controls.
	<ul> <li>INTEGRATED MOUNTING PLATFORM allows fast and easy connection of the MR16 Vacuum Lifter to the counterbalance beam, using a single crane or other lifting device.</li> </ul>
	• <b>BEAM ANGLE LIMIT SWITCHES</b> ensure that the Counter-Balancer remains level during operation, providing peace of mind. This feature prevents the counterbalance beam from tilting more than 5° out of the horizontal position, due to unintentional movement of the counterweight.
	<ul> <li>BATTERY GAUGE with segmented LED's allows the operator to visually assess the current energy level of the battery and instantly determine whether charging is needed.</li> </ul>
	• <b>AMBER STROBE LIGHT</b> signals to area personnel that a counterweight adjustment is imminent, in case a reaction is required.
	• WHITE INDICATOR LIGHT signals when counterweight has reached the forward-most position, enabling the operator to release the load remotely with minimal lifter movement.
	<ul> <li>OPTIMIZED COUNTERWEIGHT ENCLOSURE with hinged doors on top and lower half enables quick, easy filling and emptying of ballast material on the jobsite.</li> </ul>

Environmental conditions can affect product performance and longevity; consult the product instructions on www.WPG.com or contact a Technical Sales Representative for more information. Based on product information at time of publication.
